---

## Research interests

Machine learning, signal and information processing, optimization, and statistics.

Current focus is on i) developing algorithms and theory for deep learning, in particular for solving medical image reconstruction problems with deep learning, ii) developing mathematical and empirical foundations of machine learning, in particular how to learn robust models, and iii) DNA data storage and DNA as digital information technology.

---

## Education

08/2010 - **ETH Zurich**, Zurich, Switzerland.

10/2014 Ph.D. in Electrical Engineering, **ETH medal for outstanding thesis**

Advisor: Prof. Helmut Bölcskei

10/2005 - **University of Ulm**, Ulm, Germany.

05/2010 Diploma (equiv. M.S. degree) in Electrical Engineering, **with Honors**.

---

## Academic experience

06/2019 - **Technical University of Munich**, Munich, Germany.

present Assistant Professor at the Department of Electrical and Computer Engineering  
Rudolf Mössbauer Tenure Track Professor, TUM Institute of Advanced Studies  
Core member of the Munich Data Science Institute

06/2019 - **Rice University**, Houston, TX.

present Adjunct Assistant Professor at the Department of Electrical and Computer Engineering

08/2017 - **Rice University**, Houston, TX.

05/2019 Assistant Professor at the Department of Electrical and Computer Engineering

09/2022 **Stanford University**, Stanford, CA.

Visiting Scholar at the Center for Artificial Intelligence in Medicine and Imaging, Stanford School of Medicine

01/2016 - **University of California Berkeley**, Berkeley, CA.

07/2017 Postdoc at the Department of Electrical Engineering and Computer Sciences, with Prof. Kannan Ramchandran and Prof. Martin Wainwright

12/2014 - **IBM Research**, Zurich, Switzerland.

12/2015 Researcher at the Department of Cognitive Computing & Computational Sciences

08/2013 - **Stanford University**, Stanford, CA.

12/2013 Visiting PhD student at the Statistics Department with Prof. Emmanuel Candès

08/2010 - **ETH Zurich**, Zurich, Switzerland.

11/2014 Research and teaching assistant at Prof. Bölcskei's Chair for Mathematical Information Science

---

## Awards

- Young scientist honour from the Werner-von-Siemens-Ring foundation, 2022
- Capital magazine's 40 under 40, 2022
- Outstanding Reviewer Award, NeurIPS, 2021
- Runner up (second place) in the 2021 AAPM (American Association of Physicists in Medicine) Grand Challenge: "Deep Learning for Inverse Problems: Sparse-View Computed Tomography Image Reconstruction"
- Featured in the BBC Future series "The Genius Behind": This is how to store human knowledge for eternity, 2015
- ETH Zurich medal for outstanding Ph.D. thesis, 2015
- IBM first patent application invention achievement award, 2015
- Early Postdoc.Mobility fellowship from the Swiss National Science Foundation, 2014
- Best student paper award at the Int. Workshop on Comp. Systems Biology, 2012

---

## Funding

Total external funding awarded as an assistant professor: \$2,693,049

European funding:

- DAAD project for research abroad "Robust deep learning for image reconstruction", awarded as single PI, 28,052 Euro (30,080 USD). Running 2021-2022.
- BMBF project "6G life", awarded as co PI, Individual part: 576,058 Euro (665,580 USD). Grant lead by Prof. Fitzek and Prof. Boche, and includes 50 PIs from TU Dresden and TUM. Running 2021-2025.
- DFG project "Solving linear inverse problems with end-to-end neural networks: expressivity, generalization, and robustness", awarded 2021 as co PI; Individual part: 209,400 Euro (249,523 USD). Co-PI: Felix Krahmer. Running: 2021-2024.
- DFG project "Theory of un-trained neural networks for image recovery", awarded 2021 as single PI. 294,000 Euro (356,628 USD). Running 2021-2024.
- "6G Future Lab Bavaria", awarded 2021 as co-PI. Individual part: 210,000 Euro (252,305 USD). Grant lead by Prof. Kellerer and includes 13 PIs from TUM. Running 2021-2024.
- EU project "DNA-Fast light dRiven data technologY with multiplexed optical encoding and readout", awarded 2020 as co-PI. Individual part: 324,780 Euro (388,558 USD). Grant includes 6 PIs from 6 Universities and in addition three companies are involved. Running 2021-2024.

US funding:

- NIH "Polycyclic aromatic hydrocarbons: Ultrasensitive detection, early life exposures-clinical outcomes (preterm births, chronic lung disease, and neurocognitive deficits), prevention, and remediation", awarded 2019 as co-PI. Individual part: 276,064 USD. Grant includes 10 PIs. Running 2020-2025.
- NSF IIS Small "Actively learning from the crowd", awarded 2018 as a single PI: 474,322 USD. Running 2018-2023.

---

## Teaching

### At TUM

- Summer 2021 and 2022: Deep learning for inverse problems
- Winter 2019, 2020, 2021, 2022: Machine learning and optimization
- Summer 2019, 2020, 2021, and 2022: Introduction to machine learning
- Winter 2022: Seminar on diffusion models
- Summer 2022: Seminar on machine learning for molecules
- Winter 2021: Seminar on the foundations of modern machine learning practice
- Winter 2020: Seminar on the foundations and robustness of deep learning
- Summer 2020: Seminar on the foundation of deep learning in imaging science

### At Rice

- Fall 2017, Spring 2019: Optimization for data science
- Fall 2018: Introduction to machine learning
- Spring 2018: Deep networks for inference and estimation, jointly taught with Richard Baraniuk

---

## Mentoring and student supervision

### PhD supervision

- Franziska Weindel, PhD student at TUM, January 2023 - now
- Kang Lin, PhD student at TUM, December 2022 - now
- Anselm Krainovic, PhD student at TUM, June 2022 - now
- Simon Wiedemann, PhD student at TUM, December 2021 - now
- Youssef Mansour, PhD student at TUM, September 2021-now
- Jiayu Liu, PhD student at TUM, August 2021 - now
- Tobit Klug, PhD student at TUM, September 2020 - now
- Mohammad Zalbagi Darestani, PhD student at Rice, November 2018 - now

### Alumni / former group members

- Fatih Furkan Yilmaz, PhD student at Rice, August 2017 - August 2022. Next position: Research scientist at Amazon.
- Zhenwai Dai, PhD student at Rice, co-advised with Anshumali Shrivastava, August 2018 - July 2022. Next position: Research scientist at Amazon.
- Daniel LeJeune, PhD student at Rice, guest doctoral candidate at TUM in the Winter 2021-2022 Semester. Next position: Postdoctoral researcher at Stanford.

### Master and undergraduate supervision

At TUM, I supervised 8 Master's theses, 6 Projects, and 2 Bachelor's theses, at Rice I supervised 2 Master's theses, and at ETH I supervised four Master's theses.

---

## Service

### Academic service

- Area Chair NeurIPS 2022
- Area Chair ICML 2022 and 2023
- Area Chair ICLR 2022 and 2023
- Co-founded and am co-chair for the NeurIPS 2019, 2020, and 2021 workshop “Deep Learning and Inverse Problems”. The workshop is attracting 60+ submissions and 150+ participants each year.
- Guest Editor for the IEEE Journal of Selected Areas in Information Theory, for the issue ‘deep learning and inverse problems’
- Technical Area Chair for Adaptive Systems, Machine Learning, Data Analytics at the 2022 Asilomar conference
- Technical Area Chair for Adaptive Systems, Machine Learning, Data Analytics at the 2019 Asilomar conference
- Advisory committee for the BMBF Programm Mathematics for Innovations in 2019 and 2022
- Journal reviewing: Amongst others, I reviewed for some of the top multidisciplinary journals (Nature, Nature Biotechnology, Nature Communications), for top journals in machine learning and statistics (Journal of Machine Learning Research, Annals of Statistics), and for top engineering journals (IEEE Transactions on Information Theory, Image Processing, and Signal Processing)
- Conference reviewing: Amongst others, I reviewed for the top Maschine Learning Conferences (International Conference on Machine Learning, Neural Information Processing Systems, International Conference on Learning Representations, and the International Conference on Artificial Intelligence and Statistics), and the leading conferences in information theory and signal processing (IEEE International Symposium on Information Theory, IEEE International Conference on Acoustics, Speech, and Signal Processing).

### Service at the Technical University of Munich

- Member of the Examination Board of the Master’s in Robotics, Cognition, Intelligence
- Deputy of the director for the Master’s in Communications Engineering
- Member of the Admissions Board of the Master’s in Electrical Engineering and the Master’s in Communications Engineering

### Service at Rice University

- Founded, acquired \$20.000 funding for, and co-running (with students from ECE, CS, and Stats) a weekly machine learning lunch seminar that averages more than 70 participants per week (2018-2019)
- Member of the graduate committee
- Member of the ECE search committee for the faculty search in “Embedded Machine Learning”

## Member in PhD and Master committees

- Beliz Gunel, PhD in Electrical Engineering, Stanford University, 2022
- Jan Macdonald, PhD in Mathematics, TU Berlin, 2022
- Jorio Cocola, PhD in Mathematics, Northeastern University, 2022
- Antkowiak Philipp, PhD in Chemical Engineering, ETH Zurich, 2021
- Ivan Olefir, PhD in ECE, Technical University of Munich, 2021
- Rodrigo Perez, PhD in ECE, Technical University of Munich, 2021
- Jangwon Kim, PhD in Bioengineering, Rice University, 2020
- Souptik Barua, PhD in ECE, Rice University, 2019
- Babhru Joshi, PhD in Applied Mathematics, Rice University, 2019
- Chris Metzler, PhD in ECE, Rice University, 2018
- CJ Barberan, Masters in ECE, Rice University, 2019
- Oscar Leong, Master in Applied Mathematics, Rice University, 2018
- Akash Kumar Maity, Masters in ECE Rice University, 2018
- Qiang Zhang, Masters in Applied Mathematics, Rice University, 2018

---

## Publications

5 representative papers marked with \*

---

## Preprints

- P1 D. LeJeune, J. Liu, **R. Heckel**  
Monotonic risk relationships under distribution shifts for regularized risk minimization  
*arXiv:2210.11589*, Oct. 2022.
- P2 F. F. Yilmaz and **R. Heckel**  
Test-time recalibration of conformal predictors under distribution shifts based on unlabeled examples  
*arXiv:2210.04166*, Oct. 2022.

- B2 **R. Heckel**, “Super-resolution radar imaging via convex optimization”, Chapter in “Compressed Sensing based Radar Signal Processing”, 2019.

## Invited talks

40. 2023 “Distributionally robust deep learning based image reconstruction”, Information Theory and Data Science Workshop, National University of Singapore.
39. 2023 “Distributionally robust deep learning based image reconstruction”, Workshop on Seeking Low-dimensionality in Deep Neural Networks (SLOWDNN), MBZUAI, Abu Dhabi.
38. 2022 “The role of data and models for deep-learning based image reconstruction”, Workshop on “Multi-Modal Imaging with Deep Learning and Modeling” at the Institute for Pure & Applied Mathematics (IPAM), UCLA.
37. 2022 “Robustness of Deep Learning-Based Signal Reconstruction: Partial Results and Open Directions”, Oberwolfach Workshop on “Mathematical Foundations of Robust and Generalizable Learning”
36. 2022 “The role of data and models for deep-learning based image reconstruction”, Stanford School of Medicine.
35. 2022 “The role of data and models for deep-learning based image reconstruction”, ECE colloquium, UC Riverside
34. 2022 “Measuring and enhancing robustness in deep learning based imaging”, Exceptional seminar, Paris Artificial Intelligence for Society, Telecom Paris
33. 2022 “Measuring and enhancing robustness in deep learning based imaging”, Minisymposium at the International Conference for Inverse Problems on Deep Learning for Inverse Problems
32. 2021 “Measuring robustness in deep learning based compressive sensing”, Inverse Problems Seminar, University College London
31. 2021 “Measuring robustness in deep learning based compressive sensing”, Machine Learning for Algorithms Workshop of the Foundations of Data Science Institute (FODSI)
30. 2021 “Low cost DNA data storage with noisy synthesis and advanced error correction”, JPEG DNA Workshop
29. 2020 “Tutorial on Deep networks for inverse problems”, IEEE European School of Information Theory
28. 2020 “Image recovery with untrained convolutional neural networks”, Stanford SCIEN Colloquium
27. 2020 “Provable Image Recovery with Untrained Convolutional Neural Networks”, One World Mathematics of Information, Data, and Signals Seminar.
26. 2020 “Image recovery and recognition via exploiting the structural bias of neural networks”, Math FLDS / CPS seminar, University of Southern California (USC)
25. 2019 “Denoising and regularization via exploiting the structural bias of convolutional generators”, Berkeley, Computational Imaging Lunch
24. 2019 “Denoising and regularization via exploiting the structural bias of convolutional generators”, Stanford, Information Systems Lab Colloquium
23. 2019 “Image recovery and restoration with neural networks and robust storage of information on DNA”, ETH, Institute for Chemical and Bioengineering Seminar

22. 2019 “Denoising and regularization with untrained neural networks”, Asilomar Conference on Signals, Systems, and Computers
21. 2019 “Denoising and regularization via exploiting the structural bias of convolutional generators”, Allerton Conference on Communication, Control, and Computing
20. 2019 “Deep Decoder: Concise image representations from untrained networks”, Math+X symposium on inverse problems and deep learning in space exploration
19. 2019 “Regularizing inverse problems with untrained neural networks”, Machine Learning in Solid Earth Geoscience Workshop, Los Alamos
18. 2019 “Deep Decoder: Concise image representations from untrained networks”, Information Theory and Applications Workshop, San Diego
17. 2019 “Deep Decoder: Concise image representations from untrained networks”, University of Washington, Machine learning seminar
16. 2018 “Deep Decoder: Concise image representations from untrained networks”, UIUC, Coordinate Science Lab, SINE Seminar
15. 2018 “Deep Decoder: Concise image representations from untrained networks”, Winedale workshop, Windedale, Texas
14. 2018 “Deep Decoder: Concise image representations from untrained networks”, Rice University, CAAM colloquium
13. 2018 “Robust storage of information in DNA molecules”, Microsoft Research Redmond
12. 2018 “Robust storage of information in DNA molecules”, EPFL, IC talk
11. 2018 “Robust storage of information in DNA molecules”, Berkeley, Berkeley Laboratory for Information and System Sciences (BLISS) Seminar
10. 2018 “Approximate ranking from pairwise comparisons”, Information Theory and Applications Workshop
9. 2017 “Robust preservation of digital information on DNA with error-correcting codes”, UT Austin, DNA23 conference
8. 2017 “Robustness and complexity tradeoffs in inference and learning”, Rice University
7. 2017 “Robustness and complexity tradeoffs in inference and learning”, Cornell
6. 2017 “Collection and preserving information efficiently and reliably”, Cornell Tech
5. 2017 “Algorithms and theory for efficient data collection, information extraction, and preservation”, TU Munich
4. 2017 “Super-resolution and resolution limits of computational imaging systems”, Berkeley, Computational Imaging Lunch
3. 2017 “Active ranking from pairwise comparisons and when parametric models don’t help”, Berkeley, Berkeley Laboratory for Information and System Sciences (BLISS) Seminar

2. 2017 “Active ranking from pairwise comparisons and when parametric models don’t help”, Information Theory and Applications Workshop
1. 2016 “Super-resolution radar”, USC

## Press coverage

- Jan. 2021 We appeared in the German TV series Galileo for our work on DNA storage, see [video](#).
- Nov. 2020 Invited article in the German newspaper “Frankfurter Allgemeine” on DNA as an information technology ([article](#)).
- Aug. 2020 We stored the first Series of the German TV show “Biohackers” for Netflix on DNA. This was one of the first commercial applications of DNA storage, and received wide press coverage by the German media including the newspaper FAZ, a 8-minute feature in the German TV show “Gut zu wissen” (see [video](#)), and a number of blogs such as <https://blocksandfiles.com> and [www.golem.de](http://www.golem.de).
- Oct. 2018 We stored Massive Attack’s music album Mezzanine on DNA. This was the first commercial application of DNA storage and received press coverage by **Weired** “Massive Attack are releasing an album in a new format: DNA”, and **Fortune** “Scientists are coding an electronic music masterpiece into DNA so it can last forever”, amongst others.
- Nov. 2015 BBC featured a video about us and the DNA storage project in the science news series “the genius behind”, the video was broadcasted at BBC worlds news, the channel with the largest audience of any channel: <http://www.bbc.com/future/story/20151122-this-is-how-to-store-human-knowledge-for-eternity>.
- Jan. 2015 Our work on robust DNA data storage was featured in Nature as research highlight and received press coverage by BBC, CNN, and IEEE Spectrum
